### **DETAILED ACTION**

Claims 1-29 are pending.

Claims 23-24 and 27-29 appear to be improper process claims, which cannot be defined under 35 U.S.C. 101. Furthermore, since the claims are directed to use of a product it is unclear whether the product or the method is the claimed invention. Accordingly, the claims are withdrawn from consideration in the instant restriction requirement.

Since claims 23-24 and 27-29 have been withdrawn from consideration in the instant restriction requirement for the reasons stated above, such claims if amended will be treated as newly presented claims with respect to the originally presented inventions.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, drawn to a method for increasing the systemic exposure of cells to an orally administered pharmaceutically active compound comprising administering a bioenhancer comprising an inhibitor of BCRP, classified in class 514, subclass 2.
- II. Claims 25-26, drawn to an animal having inactive BCRP and/or being free of BCRP, classified in classes 800 and 800, subclasses 8 and 13.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have separate uses and different functions and different effects. For example, the method of Group I, appears to be a treatment method that relies on increasing exposure of cells to a pharmaceutically active compound while the animal of Group II can be used as a disease model. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and separate search requirement, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
